Transport packaging REDEX® Flap	FD0009GB_Transportverpackung REDEX Flap.doc	b

1 General

- / After the final approval all REDEX® Flap explosion isolation flap valves are packed by RICO Sicherheitstechnik AG.
- / The price of the packaging is included in the price of the valve.
- / The execution of the packaging is as below described. Other packaging can be ordered (e.g. special packaging for sea freight) but are subject to additional charge.
- / Each valve is packed separately.
- / RICO Sicherheitstechnik AG delivers unless otherwise expressly agreed FCA. The transport insurance is the responsibility of the customer.

DN140-DN400

DN450-DN710

2 Execution of the packaging

DN140-DN400

- / The packaging consists of a wooden baseplate, on which the valve is screwed, and a corrugated cardboard carton box which are held together by a strap out of polyethylene terephthalate (PET).
- / The wooden baseplate fulfils the ISPM 15 standard.

DN450-DN710

- / The packaging is a wooden folding box
- / All wood types used were treated after heat treatment ISPM 15 and have an IPPC stamp. The back flap is bolted to a wooden floor with squared timbers. Below the wooden floor there are three square timbers, each of which is mounted flush with the outside and in the center of the floor, thus allowing transport by means of a forklift.
- / The cover of the folding box is fixed by means of locking straps from the side walls and closes the packaging of the back flap.
- / On each side of the folding box there is a marker in the upper right area with the following icons: "Glass / Umbrella / Arrow up / IPPC".
